Summary

AI Agent engineer building LLM agents with Python, LangChain and LangGraph – RAG, tool calling/MCP and NL2SQL with validation loops. Java backend background; 100+ merged PRs to Dify and Haystack; builds with Claude Code and Codex.

Professional Experience

Junior Integration & Automation Analyst (Fixed-term Contract) Sydney, Australia
Corrs Chambers Westgarth – top-tier Australian independent law firm, ~2,000 staff Mar 2026 - Jul 2026

IT Support Ticket Agent *· GPT, Claude, LangChain, Milvus, MongoDB*

- Built a LangChain RAG pipeline over SOPs, architecture docs, incident reviews and past tickets, embedded into Milvus with versioned incremental sync so the knowledge base tracks system and rule changes.
- Integrated 10+ standardised troubleshooting tools – link tracing, monitoring, API health, SAP node and permission checks – so the agent diagnoses issues from live operational data.
- Layered metadata filters (system module, error type, compliance level) on semantic search to block look-alike matches from the wrong system; scenario-specific system prompts cover routine, peak-hour, root-cause and compliance cases.
- Curbed hallucination with fact checking and source attribution to document, section and related tickets; per-ticket MongoDB memory reloads checked nodes and conclusions across turns.
- Moved common tickets from manual multi-system triage to agent-led diagnosis that staff only verify; unresolved issues become compliant ticket drafts, filed after human confirmation with the full trace attached.

NL2SQL Analytics Agent *· GPT, Claude, LangGraph, Milvus, Elasticsearch, MySQL*

- Built a config-driven metadata layer (tables, fields, metric definitions, enum values) indexed in Milvus for meaning and Elasticsearch for exact field values, with parallel hybrid recall alongside MySQL in a traceable LangGraph workflow.
- Closed a generate-validate-repair loop – SQL constrained to the recalled schema, checked with EXPLAIN and fixed by feeding errors back to the model – turning day-long data-team queues into minute-level self-service queries.

Software Engineer (Java Backend) Shanghai, China
Newtouch Software Co., Ltd. – banking client's core business platform Aug 2022 - Apr 2023

- Delivered integration-tested Java CRUD APIs (Spring Boot, MyBatis, Oracle) for insurance policy, document and product-configuration modules in a 20-person agile team.
- Extended the modular framework with reusable components and extension points, so new insurance scenarios ship by implementing extension points rather than changing platform code.
- Tuned high-concurrency queries with multi-level Redis caching and execution-plan optimisation; built RESTful cross-system interfaces and a MinIO file tool with tiered download and read-only preview permissions.

Open Source

Contributor – Dify & Haystack Aug 2026 - Present
Agentic LLM & RAG frameworks | Dify PRs | Haystack PRs

- Merged 100+ maintainer-reviewed PRs into Dify (150k+ stars, 91 PRs) and Haystack (26k+ stars, 14 PRs).
- Migrated Dify's API request validation to Pydantic models; fixed Haystack's embedding-based splitter leaving a short trailing chunk unmerged; extended strict mypy checks across test suites.
- Worked test-first with Claude Code: failing test first, then the fix, a local CI run and line-by-line self-review.

Education

University of New South Wales – Master of Information Technology Sydney, Australia
WAM 82.4/100 (Excellence) · Top 10% of cohort · QS #19 · Coding Fest 2025 runner-up Sep 2023 - Jun 2025

Suzhou Institute of Technology, Jiangsu University of Science and Technology Suzhou, China
Bachelor of Engineering, Mechatronic Engineering Sep 2016 - Jun 2020

Skills & Certifications

AI & Agents: LangChain, LangGraph, RAG, Function Calling, MCP, NL2SQL, Prompt & Context Engineering, Guardrails
Retrieval & Data: Embeddings, Milvus, Elasticsearch, Hybrid Retrieval, MySQL, MongoDB, Oracle, SQL
Engineering: Python (Pydantic, pytest, mypy), Java, Spring Boot, MyBatis, Redis, RabbitMQ, Docker, Linux
AI Dev Tools: Claude Code, Codex – test-first development and line-by-line code review
Certifications: Claude Certified Architect – Foundations | Microsoft Certified: AI Agent Builder Associate
