Summary

Copilot Studio & Power Platform engineer with 3+ years as a full-stack software engineer, building production AI agents across the **Microsoft 365** ecosystem. I partner with non-technical stakeholders to turn business problems into live **Copilot Studio** agents and **Power Automate** automation, and know when to stay low-code versus extend with pro-code.

Professional Experience

Junior Integration & Automation Analyst

Corrs Chambers Westgarth

Sydney, Australia

Mar 2026 - Jun 2026

- Shipped a production **Copilot Studio** agent in the **Microsoft 365** ecosystem that lets staff find technical solutions across **SharePoint**, **ServiceNow**, **Loop**, and **NetDocuments** via **MCP** and **Work IQ**.
- Designed a **Dataverse**-backed trusted knowledge base, building the **data model** and **data pipeline** that store document metadata so the agent retrieves only vetted content.
- Engineered reusable **agent Skills** in **Dataverse** that raise answer accuracy while cutting **Credit** cost.
- Built dynamic **Power Automate** agent **flows** that orchestrate multi-step business logic across enterprise systems.
- Automated daily **Boomi** production-log triage with a scheduled Copilot Studio flow that calls the **Boomi API**, analyses errors against an error knowledge base, and emails fix recommendations.

Software Engineer

Newtouch Software Co., Ltd.

Shanghai, China

Aug 2022 - Apr 2023

- Developed and maintained high-scale **microservices** and **RESTful APIs** using **Java** and **Spring Boot**.
- Implemented **unit testing** using **JUnit** to improve code reliability and reduce production regressions.
- Delivered repeatable releases by containerising services with **Docker** and running **CI/CD** pipelines on **Linux**.

Projects

Joblit – AI Job Search Platform

Next.js, TypeScript, Prisma, PostgreSQL, Claude | [GitHub](#) | [Live App](#)

Sydney, Australia

Jul 2025 - Present

- Integrated **Claude Code** with multi-provider LLM orchestration and structured **prompt engineering**.
- Designed a portable **AI Skill Pack** with structured rules and quality gates for consistent LLM output across platforms.
- Developed a **Chrome Extension** (Manifest V3) with cross-site form detection and platform-specific **ATS** adapters.
- Established **CI/CD pipelines**, automated testing, and containerized deployment using **GitHub Actions** and **Vercel**.

Project Contest Platform

Java, MySQL, RabbitMQ, Docker, AWS | [Live App](#) | [Runner-up, Coding Fest 2025](#)

Sydney, Australia

Feb 2025 - Jun 2025

- Built backend **microservices** using **Spring Cloud** and implemented secure authentication with **OAuth2/JWT**.
- Enabled event-driven messaging with **RabbitMQ** for real-time notifications and cross-service coordination.
- Delivered end-to-end testing with **JUnit**, and automated deployment via a **CI/CD** pipeline on **Docker**.

Education

University of New South Wales – Master of Information Technology

WAM 82.4/100, Excellence Honours

Sydney, Australia

Sep 2023 - Jun 2025

Jiangsu University of Science and Technology – Bachelor of Engineering

Jiangsu, China

Sep 2016 - Jun 2020

Skills

Microsoft & Power Platform: Copilot Studio (Agents, Agent Flows, Skills), Power Automate, Power Apps, Dataverse

AI & Agents: AI Agents, RAG, LLM Orchestration, MCP, Work IQ, Prompt & Context Engineering, Skills Engineering

Integration & Data: Boomi, ServiceNow, Dataverse Data Modeling, Data Pipelines, REST APIs, SQL

Software Engineering: Java, Spring Boot, Python, TypeScript, React, Next.js

Cloud & DevOps: Azure, AWS, Docker, GitHub Actions, CI/CD
